## DETAILED ACTION

### ***Election/Restrictions***

1. Claims 20 and 21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected product, there being no allowable generic or linking claim. Election was made **without** traverse in the response of 4/28/03.

### ***Claim Objections***

2. Claim 22 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 22 does not further limit the system of claim 1 because a limitation reciting only a property of a material shaped in an apparatus does not alter the scope of the apparatus for shaping.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 states that the two counter-rotating screws feed stock to "the calendar portion". It is unclear that a calendar portion is used with the screws in the sheeter of claim 10. The Examiner suggests changing "calendar portion" at 3 of claim 11 to --die head portion--.

***Allowable Subject Matter***

5. Claims 1-10 are allowed.
6. Claim 11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or suggest a processing system having an internal mixer with an outlet; a sheeter that forms sheets of stock and having an inlet proximate the mixer outlet and having a sheeter outlet; and a preform shaping means for forming ball preforms from the sheets of stock wherein the improved processing system eliminates the need for a two-roll mill.

***Examiner Notes***

8. Since claim 1 is now allowable, the claims of species 2, namely 10 and 11, are no longer withdrawn. Upon submitting an amendment, claim 10 should be given the claim identifier --(ORIGINAL)--. Also, to put the application in condition for allowance, claims 20-22 should be canceled and claim 11 should be amended as suggested above and given the new claim identifier --(CURRENTLY AMENDED)--.
